**Dataflight Software and KPMG Provide a Winning Connection for
Concordance EX and Opticon Customers**

*Beta-Testers Put Dataflight's FYI Technology and KPMG's Cypress Technology Center
to the Test*

CHICAGO, June 12 – Dataflight Software, Inc., a world leader in litigation support software, today announced that it has selected accounting and tax firm KPMG LLP's Cypress Technology Center (CTEC) as the hosting site for its FYI Internet beta-testing program.

As part of the collaboration between the two companies, KPMG will make it easy for Dataflight's customers to beta-test the new FYI Internet functionality. Testers will access remote Concordance databases and Opticon imagebases by connecting to a Dataflight FYI Internet server located at CTEC.

"KPMG's Cypress Technology Center provides a technologically advanced infrastructure with server systems, communications and security software that matches the innovative client/server technology we're testing. That makes CTEC an excellent beta-test site for our customers," said Jeff Lipsman, president of Dataflight Software.

Dataflight's new FYI Internet functionality can enable attorneys, paralegals and litigation support professionals to access their critical case data more efficiently from anywhere in the world using Concordance and Opticon. Authorized users can open a remote database or imagebase just as easily as if it were stored on their personal computer or network, offering seamless collaboration for decentralized litigation teams preparing for trial.

"The need for law firms and corporations to review and share time-sensitive case information has increased dramatically, making reasonable and appropriate controls over the data security via the Internet extremely important," said Chris Paskach, partner in charge of Forensic Technology Services for KPMG LLP. "Dataflight's FYI Internet technology offers legal teams a smart, secure way to access their data using software they know and trust."

Dataflight-KPMG Alliance—Page 2

Dataflight Software is to showcase its FYI Internet technology at the Corporate Legal Times SuperConference Thursday, June 12 through Friday, June 13, in booth 107 at the Fairmont Hotel in Chicago. Dataflight Software customers interested in participating in the beta-testing program should contact Joe Utsler at 310-471-3414 or joe.utsler@dataflight.com.

About KPMG LLP

KPMG LLP is the accounting and tax firm that has maintained a continuous commitment throughout its history to providing leadership, integrity and quality to the capital markets. The Big Four firm with the strongest growth record over the past decade, KPMG offers clients the scale, global reach, industry insights, and multidisciplinary range of services they demand. KPMG LLP is the U.S. member firm of KPMG International. KPMG International's member firms have nearly 100,000 professionals, including 6,600 partners, in 150 countries. For more information, please visit www.us.kpmg.com.

About KPMG Forensic Technology Services

KPMG ForensicSM comprises three segments: Dispute Advisory Services, Investigative and Integrity Advisory Services, and Forensic Technology Services. As part of Forensic Technology Services, KPMG's Cypress Technology Center (CTEC) is housed in a highly secure 40,000 square-foot facility in Orange County, California, staffed by systems and network engineers, database designers, software developers, litigation support personnel and industry-focused professionals. CTEC's vast technology infrastructure has the capacity to meet the most complex and challenging client needs. Using either Web-based or direct-connection access, legal team members can share documents and work product and collaborate from virtually anywhere on a real-time basis. CTEC services include a centralized repository; secure access via the Internet, fixed-line connection or direct dial; controlled access to client data; backup and disaster recovery; administrative, managerial and technical support; and Help desk support 24/7. For more information about KPMG's CTEC, contact us at 714-934-5400 or visit our Web site at www.cypresstechnologycenter.com.

About Dataflight Software

Founded in 1986, Dataflight Software, Inc. builds award-winning software for the legal industry. Concordance EX and Opticon set the industry standard for litigation database management and image management software. A favorite of the USDOJ, the Fortune 100, and AmLaw 200 firms, Concordance EX allows attorneys, paralegals, and support staff to prepare for trial with confidence. The software organizes, searches, and quickly retrieves important case data – documents, transcripts, attorney notes, e-mails, and attachments (PDFs, web pages, etc) – with precision. Opticon simplifies image retrieval, editing, and document production. Together they deliver the powerful trial support legal teams need to win cases. Leading law firms with enterprise licenses include Latham & Watkins; Gibson, Dunn & Crutcher; O'Melveny & Myers; and many others. For more information contact us at 310/471-3414, info@dataflight.com or www.dataflight.com.
